Acceleration and the School Calendar

As families begin to make plans for pending permanent changes of station and family vacations. Department of Defense Dependents Schools has policies and procedures for both events to assist parents in placing school attendance high on the agenda when making transition and vacation plans. DODDS Europe supports family vacations throughout the school year which provide culturally enriching experiences for children. School officials ask that parents coordinate with schools in advance to arrange make-up work.

Some families need assistance when a PCS comes prior to the end of the school year. Principals have provided clear guidance on the DODDS policy for early withdrawal of students. The provision for permitting the early withdrawal of students with full credit recognizes that due to the military necessity, families are occasionally required to move prior to the end of the school year and that children should not be penalized for this. The 20-day limit provides reasonable flexibility without compromising academic standards or placing the student in an untenable position in regards to mastery of curriculum content.

This acceleration provision has never been intended to apply to, or be extended for, the convenience of family travel, visits or other discretionary reasons. The policy therefore requires that students present verification of the date of their sponsor's departure, (PCS or other official orders) to school officials in order to receive consideration for full academic credit. Students who withdraw prior to the 20-day limit receive a "withdrawal" grade rather than a final grade.
